

INSTRUCTIONS FOR USE OF

NEBRASKA CONSTRUCTION SPECIFICATION

(NE-83) - TIMBER FABRICATION AND INSTALLATION

1. APPLICABILITY

Construction Specification NE-83 is applicable to all types of wood construction involving the use and treating of plywood and pressure treated structural timber poles, posts, and lumber.

It may be applied to the wood materials required for the construction of timber head walls, pipe supports, water control, diversion or drop structures, and other similar type wooden structures.

2. MATERIAL SPECIFICATIONS

There are no material specifications complementary to Construction Specification NE-83.

3. ITEMS TO BE INCLUDED IN SPECIFICATIONS AND/OR DRAWINGS

- A. Plans and dimensions of all structural elements.
- B. Schedule of Materials - Complete fabrication details including number, size, type of lumber, and material; connectors (bolts, screws, nails, spikes) as required.
- C. Limit preservative and treatment method, if applicable.
- D. See EFM, Appendix 2, for standard drawings which may apply.
